

### **ELENA SACCO, PhD**

Department of Biotechnology and Biosciences (BtBs), University of Milano-Bicocca (UNIMIB).  
Piazza della Scienza, 2, 20126 Milano, Italy. Phone: +39.02.64483379, E-mail: [elena.sacco@unimib.it](mailto:elena.sacco@unimib.it)

#### ***Present positions***

- Assistant Professor in 05/E1 (Biochemistry) at BtBs, University of Milano-Bicocca
- Member of SIB (Società Italiana di Biochimica e Biologia Molecolare)
- Member of ISBE (Infrastructure for Systems Biology Europe)
- Member of Best4Food (Bicocca cEnter of Science and Technology for FOOD)
- Member of 3R Center (Center for Replacement, Reduction and Refinement in animal research),
- Member of Center for neuroscience: NeuroMI, University of Milano-Bicocca
- Member of PhD Course in Converging Technologies for Biomolecular Systems (TeCSBi), University of Milano-Bicocca.
- Member of commission of CHRONOS LID of Multicellular Advanced models at BtBs, University of Milano-Bicocca.
- Coordinator of “Progetto Piano Lauree Scientifiche di Biologia e Biotecnologie”, University of Milano-Bicocca, Milano, Italy. Third mission.

#### ***Research fields***

- Characterization and targeting of metabolism, redox homeostasis and Ras signaling in 2D and 3D preclinical cellular models of cancer in the perspective of precision medicine.
- Multiscale analysis from structure to intracellular regulatory network of biological systems under physiopathological- or environmental perturbation conditions (topics: Ras-transformation, cancer metabolism, neurofibromatosis, chemoresistance).
- Analysis of potency, selectivity and mechanism of action of small molecules, on purified proteins, cell lysates and 2D and 3D cellular models (synthetic Ras inhibitors and Natural Products including Green coffee, Cacao, Vigna Unguiculata and *Cannabis sativa* derivatives).

#### ***Main research projects ongoing***

- Research & Development of Ras inhibitors as anticancer agents (funded by Italian Ministry of University and Research (MIUR) through grants “Research facilitation fund (Fondo per le Agevolazioni alla Ricerca-FAR, Project AIMS™ AWARDS)
- Profiling and targeting of energy and redox metabolism in bladder cancer (funded in the context of AMPLITUDE grant, PI-Prof. Vanoni and by Dott. Vago IRCCS San Raffaele Scientific Institute)
- Establishment and characterization of Breast Cancer Patient-specific cellular, animal and computational models for developing personalised drug treatment targeting metabolism. (funded in the context of IT:FOC-Information Technology: The future of cancer treatment - FLAG-ERA (PI-Prof. Alberghina, Prof. Vanoni)
- Multilevel computational approach for the identification of the functional network of neurofibromin type 1 in nervous system.

#### ***Education***

- Dec 2002:** PhD in Industrial Biotechnology, University of Milano-Bicocca, Italy.  
**May 1997:** Master Degree in Biological Sciences (110/110 cum laude), University of Milano, Italy.

#### ***Previous appointments, awards and research positions***

- 2010–present:** permanent position as Assistant Professor at BtBs UNIMIB (Biochemistry);  
*Multiscale approach for the identification of regulatory biological circuits*

- 2008-2010:** winner of a government post-doc fellowship at BtBs UNIMIB; *Ras signaling: clinical target in proliferative disorders*
- 2007:** Winner of a public contest for 1-year post-doc fellowship as PI in ‘Iniziativa Ingenio’, FinLombarda Spa, Regione Lombardia, in 2007; *Development of Ras inhibitors*
- 2006:** post-doc fellow of Associazione Levi-Montalcini at BtBs UNIMIB; *Drug design*
- 2002-2005:** Winner of public contest for a 3-years post-doctoral fellowship from FIRC Unicredito Italiano 2003-2005 on cancer research at BtBs UNIMIB; *Ras-dependent carbon metabolism and transformation in mouse fibroblasts*
- 1999-2002:** 3-years PhD Italian government fellowship at BtBs UNIMIB; *Structure/function relationships of Ras-specific GEFs*
- 1997-1999:** fellow of Norpharma Spa/Biopolo at the Dept. of Physiology and Biochemistry, University of Milano; *Protein engineering*

#### **Research activities, competences and technical skills**

For years, ES has been involved in research activities in collaboration with Prof. Marco Vanoni and Prof. Lilia Alberghina, driving force for the development of Systems Biology in Italy and Europe. ES performed: structure/function studies of Ras-specific mammalian GEFs (Greco et al., 2005; Sacco et al., 2006; Sacco et al., 2010; Sacco et al., 2012a); analysis of molecular bases of Ras-transformation and metabolic rewiring (Chiaradonna et al., 2005; Chiaradonna et al., 2006; Vanoni et al., 1999; De Sanctis et al., 2016); rational design, development and characterization of Ras inhibitors with anticancer properties (Sacco et al., 2005; Palmioli et al., 2009; Sacco et al., 2011; Sacco et al., 2012b; Palmioli et al., 2017, Tisi et al., 2021), even derived from complex sources as plant extracts; analysis of the RAS/PKA pathway (Magherini et al., 2006) and reconstruction of the EGF-R signaling pathway in yeast *S. cerevisiae* (Busti et al., 2008). ES engineered proteases from yeast and archaebacteria for industrial applications of targeted proteolysis. ES has studied the complex network regulating DNA replication initiation in yeast and mammals (Sacco et al., 2012c) and she has performed a multiscale analysis from structure to intracellular regulatory and functional network of Whi5 and Rb proteins (Hasan et al., 2014). ES has expertise in studying complex intramolecular interactions-based regulatory networks, and she has considerable knowledge of Ras signaling and human disorders associated with its deregulation (Sacco et al., 2012d, Tisi et al., 2020), and System Biology integrative multi-omics approach for clinical application (De Sanctis et al., 2018, Damiani et al., 2020). ES has also expertise in designing and applying multi-level approaches for the identification of regulatory networks of complex biological systems, from molecular and biochemical analysis to concept map construction, towards mathematical modeling and simulation (manuscript in preparation). ES has explored the molecular basis of tunneling nanotubes in bladder cancer (D’Aloia et al., 2021) and the effect of cannabidiol in triple negative breast cancer cells (D’Aloia et al., 2022). ES has recently focused its research on cancer metabolism profiling and targeting, applying different methodological approaches including Seahorse and high-content confocal analysis to 2D and 3D cellular models of solid tumors (Denise et al., 2015; Pasquale et al., 2020, Raggi et al., 2021; Sforza et al. 2022; Campioni et al. 2022).

#### **Human and technical skills**

During her career ES has supervised several undergraduate, graduate and PhD students, gaining experience in human resources management. She has technical skills in DNA recombinant and molecular biology methods, mammalian cell cultures, protein/protein interaction (Biacore technology) and enzyme assays, FACS analysis; Fluorescence and Confocal Microscopy; Seahorse technology; Use of bioinformatic tools for 3D structure, biosequence, protein-protein interaction analysis, modeling and simulation of complex biological systems.

#### **Grants**

- Grant EU 7FP UNICELLSYS Eukaryotic unicellular organism biology: system biology of the control of cell growth and proliferation(2008-2013). Partner 10 UNIMIB-Subunit 2 (PI: Marco Vanoni) Role: participant.
- Grant RBPR05ZK2Z of the Italian Government (FIRB) Italbionet -Italian Bioinformatic Network (2007-2013). (Coordinator: Prof. A. Albertini). Subunit UNIMIB (PI: Prof. L. Alberghina). Role: participant.
- Grant from Creabilis Therapeutics Spa(2007-2008): *Development of RasGRF derivatives as anticancer agents* (PI: Prof M. Vanoni) Role: participant.
- AIMS AWARD: Identification of inhibitors of that selectively target Oncogenic mutant RasG13D (2019) Role: PI.
- Grant EU FLAG-ERA Information Technology: Future of Cancer Treatment ITFoC, Topic: Digital Medicine for Cancer (PI: Prof Alberghina) Role: participant
- Grant Horizon 2020 Amplitude n. 871277 grant. (PI: Marci Vanoni) Role: partecipant

**Publications**

29 papers on peer-reviewed international journals; 4 scientific book chapters, and several participations in national and international congresses.

Total publications: 32 Total citations: 477; H index =12; (Scopus, June 2022).
